

FREE FLOAT STEAM TRAP

MODEL JH7.5R CAST STEEL

HIGH PRESSURE FREE FLOAT STEAM TRAP WITH AIR VENT VALVE

Features

A reliable and durable cast steel* free float trap with tight shut-off for use on medium to large-size process equipment.

1. Self-modulating free float provides continuous, smooth, low velocity condensate discharge as process loads vary.
2. Constant water-seal design ensures steam-tight seal, even under low-load conditions.
3. Only one moving part, the free float, eliminates concentrated wear and provides long maintenance-free service life.
4. Easy-to-use air vent valve facilitates rapid start-up.
5. Easy, inline access to internal parts simplifies cleaning and reduces maintenance costs.
6. Built-in screen with large surface ensures trouble free operation.

* Stainless Steel body available on request

Specifications

Model	JH7.5R
Connection	Flanged
Size	DN 40, 50, 80
Orifice No.	1, 2, 5, 10, 14, 22, 32, 40
Maximum Operating Pressure (barg) PMO	1, 2, 5, 10, 14, 22, 32, 40
Maximum Differential Pressure (bar) ΔPMX	1, 2, 5, 10, 14, 22, 32, 40
Maximum Operating Temperature (°C) TMO	400

PRESSURE SHELL DESIGN CONDITIONS (**NOT** OPERATING CONDITIONS): Maximum Allowable Pressure (barg) PMA: 46 1 bar = 0.1 MPa
Maximum Allowable Temperature (°C) TMA: 400

CAUTION

To avoid abnormal operation, accidents or serious injury, DO NOT use this product outside of the specification range. Local regulations may restrict the use of this product to below the conditions quoted.

No.	Description	Material*	DIN	ASTM/AISI

JH7.5R Flanged (mm)

DN	L				H	H ₁	φW	Weight* (kg)
	DIN 2501	ASME Class						
	PN25/40	150RF	300RF	600RF				
40	472	471	478	494	427	291	305	62
50	476	475	481	500				63
80	504	504	514	533				72

Other standards available, but length and weight may vary

* Weight is for DIN PN 25/40

Discharge Capacity

1. Line numbers within the graph refer to orifice numbers.
2. Differential pressure is the difference between the inlet and outlet pressure of the trap.
3. Capacities are based on continuous discharge of condensate 6 °C below saturated steam temperature.
4. Recommended safety factor: at least 1.5.

CAUTION DO NOT use traps under conditions that exceed maximum differential pressure, as condensate backup will occur!
